CORPORATE GOAL

The proposed IGA supports CHA's goal of data-driven decision making for operations, planning and development.

FUNDING: Not applicable.

INTERGOVERNMENTAL AGREEMENT SUMMARY

Cook County Assessor's Office
118 N. Clark Street, Room 301
Chicago, IL 60602

Contract Type: Data Sharing Agreement

Contract Period: Effective from the date of execution for five subsequent annual data requests beginning in 2014 through 2018

GENERAL BACKGROUND

CHA's Planning and Reporting Department of the Executive Office continues to expand the agency's property data and geographic information system (GIS) infrastructure to facilitate data-driven decision making for the management of CHA-owned property, land-use planning and redevelopment.

CHA's Planning and Reporting Department will utilize the GIS data provided by the Cook County Assessor's Office (CCAO) to develop a comprehensive database that will allow CHA staff in numerous departments to perform various analyses and maintain updated records for properties owned and maintained by CHA and its partners. The CCAO data will provide CHA access to

updated citywide geographic, land use, and property assessment data as well as aerial imagery for all properties associated with the CHA's public housing and HCV programs throughout the City of Chicago.

Through the IGA, CHA will be able to receive data on an annual basis from CCAO, which will allow the agency to update the internal database and ensure more frequent, systematic access to official property records and data. The IGA is a one-way data sharing agreement; CHA will not provide data to CCAO as part of the agreement.

The Board action recommended in this item complies in all material respects with all applicable Chicago Housing Authority board policies.

The Chief of Staff concurs with the recommendation to enter into an IGA with the Cook County Assessor's Office.

The CEO recommends the approval to enter into an IGA with the Cook County Assessor's Office for geographic information system (GIS) data sharing to facilitate the expansion of CHA's property data infrastructure and to inform the development and management of CHA-owned property.
